- MySQL

Frontend

- HTML, CSS
- Bootstrap
- Javascript

Others

- Git, Github
- Postman
- Excellent communication
- Problem solving

EDUCATION

Benson Idahosa University

BSc, Computer science 2014-2018

I earned a Bachelor's Degree in Computer Science from Benson Idahosa University, Nigeria.

SUMMARY

I am writing to express my interest in joining your product team as a software developer. With my enthusiasm, technical proficiency, and problem-solving skills, I am confident that I can contribute to building and maintaining innovative software and applications that will enhance your company's customer service and internal operations.

In addition to my technical expertise, I understand the importance of collaboration with business stakeholders. I have experience working closely with non-technical teams to gather and analyze business requirements, translating them into software requirements that align with the company's goals. By fostering strong relationships and effective communication, I ensure that the software I develop meets the needs of both end-users and the organization as a whole.

WORK EXPERIENCE

Web Developer/ Freelancer

Precious Apparel Fashion Academy

2020-2022

- Contributed to existing software by identifying and fixing bugs, implementing new features, and optimizing performance.
- Built user-friendly client-facing products using HTML, CSS, and jQuery that followed modern web development best practices and adhered to accessibility standards.
- Designed and implemented efficient MySQL database models and tables that provided fast data retrieval.
- Completed tasks assigned on Asana within deadlines and communicated effectively with team members and project managers.
- Developed scalable RESTful APIs using Codeigniter and Laravel that ensured seamless communication between frontend and backend.
- Collaborate closely with cross-functional teams, including engineers, designers, product managers, and stakeholders, to meet client requirements and business goals.

Web Developer

Nugi Technologies

2019-2020

- Contributed to existing software by identifying and fixing bugs, implementing new features, and optimizing performance.
- Built user-friendly client-facing products using HTML, CSS, and jQuery that followed modern web development best practices and adhered to accessibility standards.
- Designed and implemented efficient MySQL database models and tables that provided fast data retrieval.
- Completed tasks assigned on Asana within deadlines and communicated effectively with team members and project managers.

Intern

Nugi Technologies

2018-2019

- Contributed to existing software by identifying and fixing bugs, implementing new features, and optimizing performance.
- Completed tasks assigned on Asana within deadlines and communicated effectively with team members and project managers.
- I acquired proficiency in using Git for version control and learned how to work collaboratively with team members, enhancing my communication and teamwork skills.
- Collaborated with experienced engineers as an intern, contributing to the development of software projects and gaining valuable insights into software development practices.
- Conducted visual testing of software developed by other engineers to identify any potential issues and ensure a seamless user experience.
